EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In the claims:

Claims 40-77 have been canceled.

Reason for claims being canceled

2. The application has been amended as follows: Newly submitted claims 40-77 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: See restriction requirement below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-25, 32-39 are, drawn to a wheelchair cushion, classified in class 5, subclass 653.
- II. Claims 40-55, drawn to pelvic captivation structure, classified in class 5, subclass 739.
- III. Claims 56-70, drawn to temperature control module, classified in class 5, subclass 284.
- IV. Claims 71-77, drawn to seat cushion, classified in class 5, subclass 654.

3. Inventions Group I and Groups II-IV are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1)

the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations have utility by themselves or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the combination does not require the u-shaped base member (see claim 18 as evidence that such base member is not required for patentability) and/or a cushion element formed from a material that insulates the thermal transfer element and cushion from the user and said cushion element being positioned beneath the thermal transfer element. The subcombinations have separate utility such as a back support, ice or warming pack, back support having an ice or warming pack respectively.

4. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 40-77 have been canceled as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunil Singh whose telephone number is (571) 272-7051. The examiner can normally be reached on Monday through Friday 10:30 AM - 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (571) 272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
